Financial Literacy Activities

Purpose

These financial literacy activities for teachers in Louisiana aim to create a lasting impact on students' financial well-being by providing educators with the necessary skills and resources needed to teach financial literacy. This, in turn, helps students build a foundation for making sound financial decisions throughout their lives. The lessons are aligned with [Act 267](#), which requires Louisiana students to complete a course in Personal Financial Literacy. In addition, these activities are designed to be used along with your system's scope and sequence and/or financial literacy curriculum. These activities aim to

- provide teachers with engaging, hands-on activities that are easy to implement in the classroom, helping them foster a positive and interactive learning environment around financial literacy;
- prepare students to make informed and responsible financial decisions in their personal lives, both now and in the future; and
- allow students to apply financial concepts to real-life situations, preparing them for future financial responsibilities such as budgeting for expenses, understanding loans and credit, and selecting a bank account that suits their needs.

Below are six hands-on activities to engage students in personal finance

- [Balancing a Checkbook](#)
- [Basic Principles of Money](#)
- [Basic Principles of Personal Insurance](#)
- [Completing a Loan Application](#)
- [Computing Interest Rates by Various Mechanisms](#)
- [Types of Bank Accounts Offered](#)
