

Grade 4 Mathematics

Achievement Level Descriptors

Major Content

The student solves problems involving the Major Content for the course with connections to the Standards for Mathematical Practice.

Major Content				
Content	Level 5: Advanced	Level 4: Mastery	Level 3: Basic	Level 2: Approaching Basic
Compare Fractions and Compare Decimals 4.NF.A.1 4.NF.A.2 4.NF.C.5 4.NF.C.6 4.NF.C.7 LEAP.I.4.1	Compares decimals to hundredths; uses decimal notations for fractions (tenths and hundredths). Compares fractions, with like or unlike numerators and denominators, by creating equivalent fractions and comparing to a benchmark fraction.	Given a visual model, compares decimals to hundredths; expresses a fraction with denominator 10 as an equivalent fraction with denominator 100 ; uses decimal notation for fractions (tenths and hundredths); and compares fractions, with like or unlike numerators and denominators, by creating equivalent fractions and comparing to a benchmark fraction.	Given a visual model, compares decimals to hundredths; uses decimal notations for fractions (tenths and hundredths); and compares fractions, with like or unlike numerators and denominators by comparing to a benchmark fraction.	Given a visual model, compares decimals to hundredths; uses decimal notations for fractions (tenths and hundredths); and compares fractions with like denominators.
	Recognizes that decimals and fractions must refer to the same whole in order to compare.	Recognizes that decimals and fractions must refer to the same whole in order to compare.	Recognizes that decimals and fractions must refer to the same whole in order to compare.	
	Shows results using symbols.	Shows results using symbols.	Shows results using symbols.

Multiply Fractions by Whole Numbers 4.NF.B.4	Describes a visual fraction model and solves mathematical and real-world problems by recognizing that a fraction a/b is a multiple of $1/b$ and multiplies a fraction by a whole number.	Using visual models, solves mathematical and real-world problems by recognizing that a fraction a/b is a multiple of $1/b$ and multiplies a fraction by a whole number.	Using visual models, solves mathematical problems by recognizing that a fraction a/b is a multiple of $1/b$ and multiplies a fraction by a whole number.	Using visual models, solves mathematical problems by recognizing that a fraction a/b is a multiple of $1/b$.
Multiplicative Comparison 4.OA.A.1 4.OA.A.2	Interprets multiplication equations as comparisons and represents statements of comparisons as multiplication equations.	Interprets multiplication equations as comparisons or represents statements of comparisons as multiplication equations.	Interprets multiplication equations as comparisons or represents statements of comparisons as multiplication equations.	Interprets multiplication equations as comparisons or represents statements of comparisons as multiplication equations.
	Uses multiplication or division to solve multi-step word problems involving multiplicative comparisons.	Uses multiplication or division to solve one- or two-step word problems involving multiplicative comparisons.	Uses multiplication or division to solve scaffolded one- or two- step word problems involving multiplicative comparisons.	
	Uses a symbol for the unknown number in an equation or expression.			
Solve Multi-step Problems 4.OA.A.3 4.NBT.B.5 4.NBT.B.6 LEAP.I.4.2 LEAP.I.4.3 LEAP.I.4.4 LEAP.I.4.5	Solves multi-step word problems using the four operations with whole numbers.	Solves two-step word problems using the four operations with whole numbers.	Solves one- or two-step problems using the four operations with whole numbers.	Solves one-step problems using the four operations with whole numbers.
	Multiplies a three- or four-digit by a one-digit number, or two two-digit numbers.	Multiplies a three-digit by a one-digit number, or two two-digit numbers.	Multiplies a three-digit by a one-digit number, or two two-digit numbers.	Multiplies a three-digit by a one-digit number, or two two-digit numbers.
	Finds whole number quotients and remainders with up to four-digit dividends and one-digit divisors and interprets remainders.	Finds whole number quotients and remainders with up to three-digit dividends and one-digit divisors and interprets remainders.	Finds whole number quotients and remainders with up to three-digit dividends and one-digit divisors.	Finds whole number quotients and remainders with up to three-digit dividends and one-digit divisors.

Major Content				
Content	Level 5: Advanced	Level 4: Mastery	Level 3: Basic	Level 2: Approaching Basic
Place Value 4.NBT.A.1 4.NBT.A.2 4.NBT.A.3	In any multi -digit whole number, recognizes a digit in one place represents 10 times as much as it represents in the place to its right.	In any four -digit whole number, recognizes a digit in one place represents 10 times as much as it represents in the place to its right.	In any three-digit whole number, recognizes a digit in one place represents 10 times as much as it represents in the place to its right.	In any three-digit whole number, recognizes a digit in one place represents 10 times as much as it represents in the place to its right.
	Reads, writes, and compares multi -digit whole numbers using base-10 numerals, number names in expanded form and symbols (>, <, =), rounds to any place value.	Reads, writes, and compares four -digit whole numbers using base-10 numerals, number names in expanded form and symbols (>, <, =), and rounds to any place value.	Reads, writes, and compares three-digit whole numbers using base-10 numerals, number names in expanded form and symbols (>, <, =), and rounds to any place value with scaffolding.	
Addition and Subtraction 4.NBT.B.4 LEAP.I.4.7 LEAP.I.4.8	Fluently adds and subtracts multi-digit whole numbers	Fluently adds and subtracts multi-digit whole numbers.	Adds and subtracts multi-digit whole numbers.	Adds or subtracts multi-digit whole numbers.
	Solves multi -step problems by adding or subtracting multi-digit whole numbers.	Solves two -step problems by adding and subtracting multi-digit whole numbers.	Solves one-step problems by adding and subtracting multi-digit whole numbers.	Solves one-step problems by adding and subtracting multi-digit whole numbers.

Additional & Supporting Content

The student solves problems involving the Additional & Supporting Content for the course with connections to the Standards for Mathematical Practice.

Additional & Supporting Content				
Content	Level 5: Advanced	Level 4: Mastery	Level 3: Basic	Level 2: Approaching Basic
Operations and Factors 4.OA.B.4	Recognizes a whole number is a multiple of factors and determines all factor pairs and multiples of whole numbers within the range of 1-100.	Recognizes a whole number is a multiple of factors and determines factor pairs or multiples of whole numbers within the range of 1-100.	Recognizes a whole number is a multiple of factors and determines factor pairs or multiples of whole numbers within the range of 1-100.	Recognizes a whole number is a multiple of factors and identifies factor pairs or multiples of whole numbers within the range of 1-100.
	Determines whether a whole number in the range 1-100 is prime or composite.	Determines whether a whole number in the range 1-100 is prime or composite.	Determines, with scaffolding, whether a whole number in the range 1-100 is prime or composite.	
Measurement and Conversion 4.MD.A.1 4.MD.A.2 4.MD.A.3 LEAP.I.4.6	Solves measurement word problems with whole numbers, including calculating area and perimeter (when side lengths are not provided), using all four operations, and using addition, subtraction, and multiplication of simple fractions.	Solves measurement word problems with whole numbers, including calculating area and perimeter (when information about side lengths is provided) , using all four operations, and using addition, subtraction, and multiplication of simple fractions.	Solves mathematical measurement problems with whole numbers using all four operations, and using addition, subtraction, and multiplication of simple fractions.	Solves mathematical measurement problems with whole numbers, using all four operations, and using addition and subtraction of simple fractions.
	Records measurement equivalents in a two-column table.	Records measurement equivalents in a two-column table.	Records measurement equivalents in a two-column table.	
	Uses knowledge of measurement units within one system to solve problems by converting from larger units to smaller units.	Uses knowledge of measurement units within one system to solve problems by converting from larger units to smaller units.	Uses knowledge of measurement units within one system to convert from larger units to smaller units.	

Additional & Supporting Content				
Content	Level 5: Advanced	Level 4: Mastery	Level 3: Basic	Level 2: Approaching Basic
	Represents measurement quantities using diagrams and provides the appropriate measurement scale given the context.	Represents measurement quantities using diagrams with a given measurement scale.		
Represent and Interpret Data 4.MD.B.4	Makes a line plot to display a data set of measurements in fractions of a unit with like denominators of 2, 4, or 8, (including mixed numbers) and uses addition and subtraction of fractions to solve problems involving information in the line plots and evaluates the solution in relation to the data.	Makes a line plot to display a data set of measurements in fractions of a unit with like denominators of 2, 4, or 8 and uses addition and subtraction of fractions to solve problems involving information in the line plot.	Makes a line plot to display a data set of measurements in fractions of a unit with like denominators of 2 or 4.	Identifies a correct line plot that displays a data set of measurements in fractions of a unit with like denominators of 2 or 4.
Geometric Measurement 4.MD.C.5 4.MD.C.6 4.MD.C.7	Understands and applies concepts of angle measurement recognizing that angles are measured in reference to a circle.	Understands and applies concepts of angle measurement.	Understands and applies concepts of angle measurement.	Understands and identifies concepts of angle measurement.
	Recognizes how angles are formed and that angle measures are additive.	Recognizes how angles are formed and that angle measures are additive.		
	Uses a protractor to measure and sketch angles.	Uses a protractor to measure and sketch angles.	Uses a protractor to measure angles.	
	Solves mathematical and real-world problems by composing and decomposing angles and using an equation with a symbol for the unknown angle measure.	Solves mathematical and real-world problems by composing and decomposing angles.		

Additional & Supporting Content				
Content	Level 5: Advanced	Level 4: Mastery	Level 3: Basic	Level 2: Approaching Basic
Additive Area 4.MD.D.8	Recognizes area as additive and find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real-world problems.	Recognizes area as additive and find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real-world problems.	Recognizes area as additive and find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts.	
Lines, Angles and Shapes 4.G.A.1 4.G.A.2 4.G.A.3	Fluently identifies and uses points, lines, line segments, rays, angles (right, obtuse and acute), perpendicular lines, parallel lines, lines of symmetry, and right triangles to classify or describe two-dimensional figures.	Identifies and uses points, lines, line segments, rays, angles (right, obtuse and acute), perpendicular lines, parallel lines, lines of symmetry, and right triangles to classify two-dimensional figures.	Identifies and uses points, lines, line segments, rays, angles (right, obtuse and acute), perpendicular lines, parallel lines, lines of symmetry, and right triangles to classify quadrilaterals and triangles.	Identifies points, lines, line segments, rays, angles (right, obtuse and acute), perpendicular lines, parallel lines, lines of symmetry, and right triangles.
Generate and Analyze Patterns 4.OA.C.5	Generates a number or shape pattern that follows a given rule and identifies apparent features of the pattern (not explicit in the rule) and describes the rule for generating the number or shape pattern.	Generates a number or shape pattern that follows a given rule and identifies explicit features of the pattern.	Generates a number or shape pattern that follows a given rule.	Identifies a number or shape pattern that follows a given rule.

Mathematical Reasoning & Modeling

In connection with course content, the student: expresses course-level appropriate mathematical reasoning by constructing viable arguments and critiquing the reasoning of others; attends to precision when making mathematical statements; solves real-world problems with a degree of difficulty appropriate to the grade/course by applying knowledge and skills articulated in the standards for the current grade/course (or for more complex problems, knowledge and skills articulated in the standards for previous grades/courses); engages in the modeling practice by using mathematics to solve problems arising in everyday scenarios; makes sense of problems and perseveres when solving them; uses appropriate tools strategically; and looks for and makes use of structure.
