Purpose

The *Directions for Practice Test Administration* (DPTA) provides the Test Administrator (TA) of the LEAP Connect practice test with specific instructions for administration of this particular practice test. Each DPTA provides the exact wording of the items to be used by the TA, the materials needed in preparation of the practice test, and guidelines for how to present the items to the student.

Materials

Materials needed for the LEAP Connect Practice Test Administration:

1. *Directions for Practice Test Administration* (DPTA)
2. *Procedures for Assessing Students Who Are Visually Impaired, Deaf, or Deaf-Blind*
3. *Grade 4 ELA Practice Test Reference Materials and Writing Stimuli*

Directions

1. **Know and follow all directions for test administration** provided in the *DPTA* and *Procedures for Assessing Students Who Are Visually Impaired, Deaf, or Deaf-Blind*.
2. Be familiar with and utilize the Text to Speech (TTS) as appropriate. The DRC INSIGHT Assessment System includes TTS that will read aloud the text of directions, items, and answer options and will also read aloud standardized descriptive statements for tables, charts, graphs, and timelines.
 - a. This text is read to all students using a consistent rate of reading and tone of voice. If a student wishes to have any or all of the text repeated, click on the Starting Points button (the circle between the Stop and Play/Pause buttons). Then use the mouse to select the Starting Point (blue circle) just before the text that needs to be repeated.
 - b. To change the volume or speed of the TTS or turn off the follow-along, select the Options button at the bottom of the screen, then select Audio Settings and adjust as desired.
 - c. If the TTS will not be used, the TA can turn off the volume and the follow-along using the Audio Settings. The TA must read the directions, items, answer option text, and graphic descriptions **exactly as written** using a consistent rate of reading and tone of voice.
3. Be familiar with and utilize the Alternative Text as appropriate. Alternative Text is bracketed and written in italics. Alternative Text is included for students who are blind or have a visual impairment and require graphics to be described. This Alternative Text includes descriptive statements for tables, charts, graphs, and any graphics necessary for appropriate interaction with the items to be described.

Guidance on Printed Materials

ELA Reference Materials and Writing Stimuli include required graphics and the answer options for each test item. The DPTA will prompt the TA when the required graphics are to be presented to the student. The answer options are included so they can be copied and used as needed (e.g., eye-gaze boards).

The LEAP Connect practice test includes one constructed-response writing item at each grade level. Writing Stimuli are provided for the constructed-response item. Review the item and prepare materials as needed **prior to the administration** of the constructed-response writing items.

Selected-Response Items

Selected-response items are presented in the following order:

- Item stimulus (which may include a passage, passage part, picture, graphic, or other illustration)
- Item question
- Answer options (which are indicated by radio buttons and presented vertically)

Students independently select a response from the options. Being mindful that students will respond in a variety of ways (e.g., with words, gestures, eye gaze, communication devices, assistive technology, etc.), TAs can enter responses on behalf of the student. Ensure that Augmentative and Alternative Communication (AAC) and Assistive Technology (AT) used routinely for instruction are available to support the student in communicating responses.

Reading Selected-Response Item Example

The LEAP Connect practice test items reflect grade-level content presented at varying degrees of complexity. The following item example illustrates a selected-response item and components which support the ways that students with a wide range of learner characteristics are presented with practice test items. The following item example does not reflect ALL content that is assessed in each grade-level content area and does not represent every degree of complexity.

Reading Item Example

Directions

TTS or TA reads item direction.

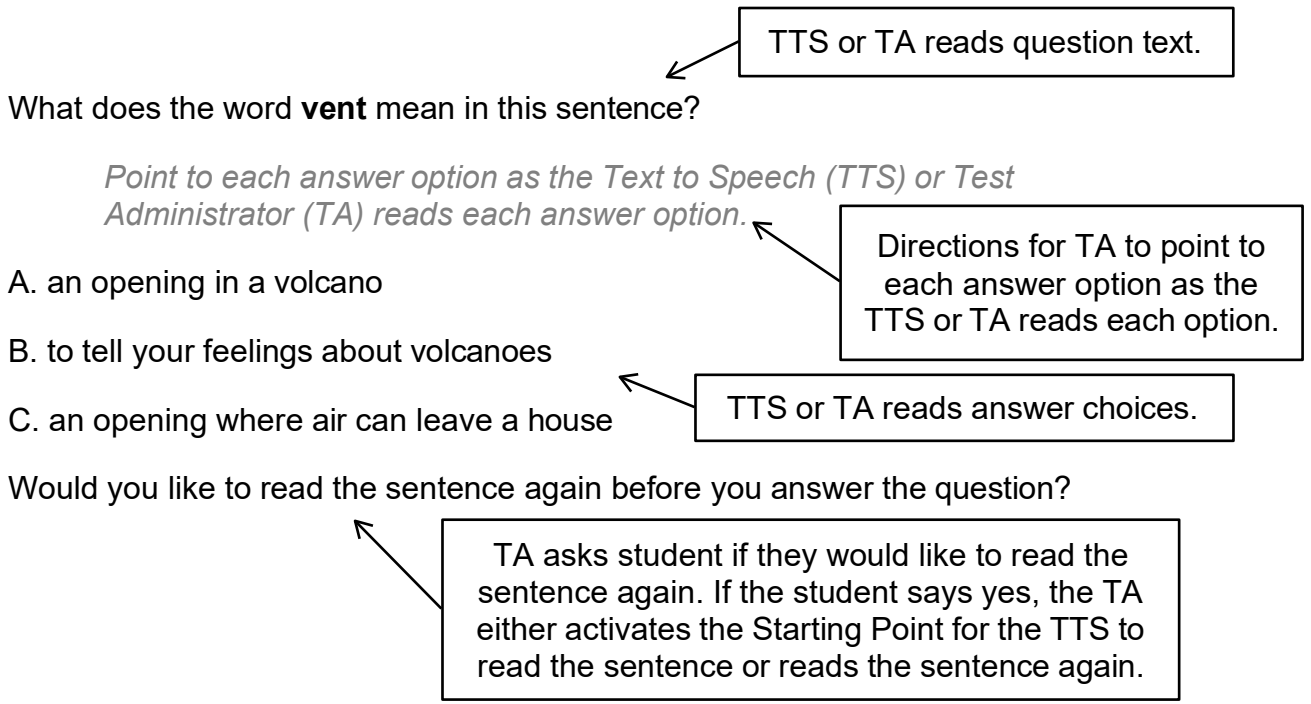

We read about volcanoes. We are going to read a sentence again. Listen for clues that tell you what the word **vent** means.

TTS or TA reads the sentence from the passage.

When pressure builds, the molten rock can come to the surface through a **vent**.

Directions for TA to point to the bolded word.

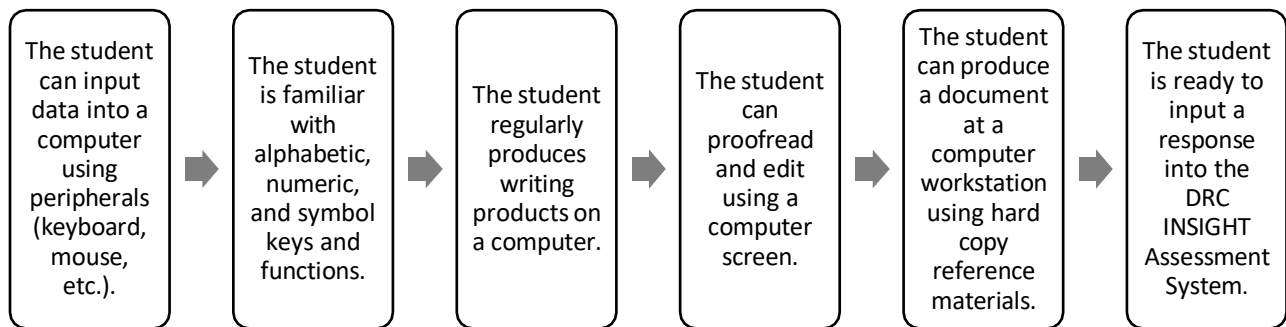

Point to the bolded word.

Constructed-Response Item

The constructed-response (CR) item requires students to produce a response to a writing prompt (i.e., expressive language). The item is presented to the student in a standardized, scripted sequence of steps that include statements read by the TTS and TA and directions for the presentation of grade- and prompt-specific materials that need to be prepared as appropriate for each student. The Student Response Template is identified by a card number for each CR item in the Writing Stimuli. The student may use the Student Response Template located in the *ELA Reference Materials and Writing Stimuli* to write a response to the CR item, but **the final product is entered into the DRC INSIGHT Assessment System**. Please note that if the TA makes the determination that a student is capable of entering an online response utilizing a keyboard, the student is not required to use the Student Response Template and may type and edit the response in the response spaces in the DRC INSIGHT Assessment System.

A TA needs to determine the way in which a student will create a constructed response in writing. A student can use the Student Response Template to write a response or can enter an online response utilizing a keyboard. The following statements are provided to assist TAs in determining whether to allow the student to enter an online response into the DRC INSIGHT Assessment System.

The CR writing prompt is administered in the following manner:

1. The student is presented with the writing task and the text type (e.g., story or essay) to be produced.
2. The student is then presented with a model of the text type.
3. The TA presents the steps of the writing task as planning, writing, revising, and editing a response, using a script that includes references to materials to present to the student to support the construction of a response.
4. First, the student organizes ideas related to the topic. Next, the student writes a response using the provided Student Response Template or types into the DRC INSIGHT Assessment System. Then the student is allowed to revise and edit the response. Last, the TA reads aloud the finished product to the student.
5. If the student types the response into the DRC INSIGHT Assessment System, the student may not utilize the computer's browser functions during CR item administration.
6. If the student did not type the response into the DRC INSIGHT Assessment System, the TA must transcribe the student response into the DRC INSIGHT Assessment System in the appropriate boxes. **The TA must also type any necessary annotations in the text box beneath the item. (See *Procedures for Annotation* and *Procedures for Transcription* below.)**

Procedures for Annotation of Writing CR Item

To ensure student's written product is easily interpreted during scoring (e.g., use of inventive spelling or symbolic expressions), the TA **must** provide annotations in the DRC INSIGHT Assessment System in the text box beneath the item labeled "*For Test Administrator use if annotations are necessary.*" The annotation is to be written by the TA and must not alter the intent of the student's original response; rather annotation ensures that the response is interpretable and meaningful to a scorer.

After students have finished composing their written responses, the TA will read the student's response and do the following:

- Add annotation to describe or clarify the intended meaning of pictures, symbols, or objects included in the student's original response.
- Add annotation to clarify incorrect spelling as needed to ensure correct

interpretation.

- Make annotations in the proper location (the text box beneath the item) to distinguish from the student's original response.
- If a student types an uninterpretable word (e.g., inventive spelling), type the intended word in parentheses directly following the uninterpretable word in the DRC INSIGHT Assessment System to clarify student wording. DO NOT remove student wording or phrasing.
- Not include comments or explanations of the student's response except if needed for clarification.
- Provide an opportunity for the student to review and modify what has been annotated.
- The annotation box is **not** intended for TA feedback about the CR item or the LEAP Connect assessments. TAs may send any feedback or questions to assessment@la.gov.

Procedures for Transcription of Writing CR Item

If a student did not type the response into the DRC INSIGHT Assessment System, the TA must transcribe the student's response including any annotations into the response area(s) for that item.

The TA will:

- Enter the response after completing the administration of the CR item.
- Enter the entire response exactly as the student has written it and annotate as appropriate (see *Procedures for Annotation of Writing CR Item*). Not revise, edit, or alter the student's response in any way, unless directed to do so by the student.
- Not provide feedback regarding any aspect of the student's response unless directed to do so by the student.

If the student is able to provide a response to the system independently, the TA is encouraged to allow the student to do so. In this case, the TA is not required to complete the task of transcription.

After the TA has transcribed and provided annotations for a constructed-response item, the item is considered completed. When all transcriptions and annotations are completed for the CR item, the session is completed and the test must be submitted.

Use of a Scribe for Writing CR Item

The TA may decide before testing begins, based on student need, that the use of a scribe is the best way to capture the student's response for the writing CR item. This process should be practiced with the student prior to testing during regular classroom instruction in order to ensure that the student and the TA understand the process. The process of scribing should not be a barrier for the student. If a scribe is utilized, the scribe must: 1) transcribe the work into the online system and 2) annotate.

The scribe will:

- Begin the session with an introduction, explain the process, and direct the student to indicate when to use capitalization and punctuation when needed, and must allow the student to revise and edit what the scribe has written.
- Write exactly what the student communicates on paper or directly into the DRC INSIGHT Assessment System.
- Correctly spell all words.
- Capitalize words or punctuate text only when indicated by the student.
- Make student-requested changes, even if incorrect.
- Allow the student to edit for punctuation, capitalization, or other edits as described in the DPTA.
- Orally confirm meaning of homonyms and commonly used homophones (e.g., than and then; to, two, and too; there, their, and they're).

Augmentative and Alternative Communication Guidelines for Writing

Ensure that AAC and AT that are used routinely for instruction are available to support the student in communicating answer responses. Allow students to complete the tasks using their preferred method of communication (e.g., pointing, eye gaze, assistive technology, oral response, sign language).

Please refer to the *LEAP Connect Test Administration Manual, Appendix B*, which provides detailed methods and protocols for using AAC systems and devices to respond to the writing CR items.

We are going to read an informational text about people moving west and railroads. Listen for an important idea of the text.

A Railroad across America

A long time ago, Americans wanted to travel to the West.

Railroads did not cross the United States. People had to travel in wagons. Horses pulled the wagons.

People carried **supplies** in the wagons. All of their food, clothing, and tools needed to fit in the wagons.

Mountains were crossed. The weather was bad some of the time. Travel across the land was hard. But, many people made it across to the West. They started a new life.

New towns were built. Then, people needed to get supplies to live. The fastest way to travel was by railroad. More railroads were needed.

Point to the title and each bullet and fact as the TTS or TA reads the graphic description.

Jack jumped on his bike to head home. He waved goodbye to Charlie and called out, "See you tomorrow!" The afternoon had gone by quickly. It always did when Jack and Charlie played. Now, Jack was in a hurry to get home. It was almost four o'clock and Jack's mom said to be home by then.

Jack slowed down when he reached the corner by his house. He could see his mom. "Yes!" he thought. "I'm going to make it home in time." He started to call out to his mom, but then he heard an unusual sound. He stopped to listen and heard the sound again.

“Hoot. Hoot.” The sound was coming from over his head. Jack looked up into the trees, but he could not see anything. The sunshine was **brilliant**. Jack had to look away.

But, there was no time to spare — Jack rushed home. When he arrived, his mom said with a smile, “Thanks for getting home on time.”

The next day, Jack and Charlie had another fun afternoon. Jack left so he could arrive at home by four o'clock. But just like the day before, he heard that same sound, “Hoot. Hoot.”

Wow! Jack had never heard or seen an owl before. When Jack arrived at home, it was after four o'clock. "Mom, guess what I saw?" Jack shouted. Jack told his mom all about the owl.

Directions

We are going to read an informational text about Lewis and Clark's travels across the West. After we read, you will be asked a question about the main idea.

New Discoveries

Lewis and Clark traveled by boat all across the West. They were looking for a water route to the Pacific Ocean. They also planned to record information along their route.

Lewis and Clark found plants and animals they had never seen before. They saw about 200 plants. They saw more than 100 animals.

Lewis and Clark did more than just see these plants and animals. They wrote about them in journals. Lewis and Clark told what each plant and animal looked like. They explained what the animals did. They reported important information.

[Graphic description: "This is a diagram of a Prickly Pear cactus. There is a label for leaves with arrows pointing to two flat oval shaped leaves of the cactus. There is a label for thorns with an arrow pointing to long, pointy thorns on the cactus. There is a label for flowers with an arrow pointing to flowers on the cactus. There is a label for roots with an arrow pointing to roots on the cactus."]

Prickly Pear Cactus

Lewis wrote about the Prickly Pear cactus plant. He wrote that the cactus was pretty. But, he did not always like the cactus. The cactus had thorns that would stick into his feet. Lewis had to walk carefully because there were so many cactus plants.

[Graphic description: "This is a chart titled 'Pressing Plants.' It has four steps. Step one is 'Place the plant in folded paper.' and there is a picture of a flower on a folded piece of paper. Step two is 'Place the plant in a book and close.' and there is a picture of the plant on the folded piece of paper on the pages of a book. Step 3 says 'Place the plant in the sun to dry.' and there is a picture of the plant on a large rock. Step 4 says 'Place the plant back on the paper and book.' and there is a picture of the plant on the folded piece of paper on the pages of a book."]

Pressing Plants

<p>1. Place the plant in folded paper.</p> 	<p>2. Place the plant in a book and close.</p> 	<p>3. Place the plant in the sun to dry.</p> 	<p>4. Place the plant back on paper and book.</p> 
--	--	---	---

Lewis shared information about new plants another way. He collected some plants. He pressed them flat. Then Lewis sent the pressed plants back home with other travelers.

Lewis and Clark's journals and the pressed plants were important to science. Lewis and Clark did not find the water route they were looking for. But their journals helped people learn about new plants and animals that lived in the West.

What is the main idea of this text?

Point to each option as the TTS or TA reads each option.

Card 5a: Blank place card

Card 6a: Capital letters, end punctuation, and complete sentence

Card 7a-8a: Response Template

Item 32

Directions

You are going to write a story about going somewhere. First, you are going to listen to a story about a girl who went to the lake to give you some ideas for your story.

Present Card 1a: A Day at the Lake as the TTS or TA reads the story aloud. Point to the illustrations from Card 2a from left to right as the story is read. The illustrations are indicated by superscripts in the passage on Card 1a.

A Day at the Lake

One day, Ruby went to the lake with her family. She had fun at the lake.

First, Ruby went swimming. She put on her swimsuit and life jacket. She ran to the lake and jumped in. The water was cold, but she had fun splashing in the water.

Then, Ruby went fishing. She caught one tiny fish. Ruby laughed! The fish was as small as her hand.

In the end, Ruby went home. She had fun on her visit to the lake.

After Card 1a is read, move it and Card 2a to the side where the student can refer to them.

In the story, a girl went to the lake. Now you are going to write a story about going somewhere. You can either write about a time you went somewhere or make up a story about someone else who went somewhere.

In your story, you will include two events and tell about those two events.

At this stage of the item administration, the TA will work with the student using the printed stimulus material. If the student will enter the response in the DRC INSIGHT Assessment System, the student may type in the response areas on the screen instead of writing on Cards 7a and 8a.

Now, remove Cards 1a and 2a.

Remove Card 3a. Move Card 4a to the side so the student can refer to it when writing. Go to Selection of Place below.

If the student picks someone else, remove Card 3a and present Card 4a. Say the following statement:

You want the story to be about someone else. What is the name of the character in your story?

Write the selected character's name on Card 4a, read the name aloud to the student, and then move it to the side so the student can refer to it when writing.

Selection of Place
