

Instructional Materials Professional Learning Partner Efficacy Ratings

Professional Learning Efficacy Indicators

In response to requests from school systems, the LDOE has introduced Professional Learning Efficacy Indicators to the [Instructional Materials Professional Learning Partner Guide](#) evaluation process. The Professional Learning Efficacy Indicators are a framework emphasizing key elements that impact the value of educators' learning experiences. Incorporating these indicators into the professional learning partner guide evaluation process intends to convey valuable information about professional learning providers. The data gleaned from these indicators will signal to educators and stakeholders the quality and effectiveness our professional learning partners can provide.

High-Quality Professional Learning: High-Quality Professional Learning (HQPL) is led by a knowledgeable facilitator using a cycle of learning over a period of time and includes ongoing collaboration and coaching, and transfer into classrooms. HQPL begins with student and teacher academic needs and supports the implementation of high-quality instructional materials, leading to increased student outcomes.

Data Collection Process

The data collection process for this initiative is twofold. The first phase of the process requires PL Partners to submit feedback collected from participant surveys. For the second phase of the process, the LDOE collects feedback from school systems regarding their experiences using the professional learning services of each partner. Responses to indicators are averaged into an overall score based on a five-point scale. The Professional Learning Efficacy Indicators used for this data collection are:

Focus on Instructional Skills

- Was the professional learning focused on HQIM?
- Did participants acquire the intended knowledge and skills?

- Did the professional learning partner provide consistent access to content experts, supporting teachers in increasing their content and pedagogical knowledge?

Change in Practice and Sustainability

- Did the professional learning partner provide support and resources for the effective application of new learning beyond the training and/or coaching sessions?
- To what degree would you agree with the following statement (on a scale of 1-5, with 5 being the highest):
 - The partnership has resulted in positive changes in practices and procedures (i.e., planning, learning, instructional practice, leadership style/abilities).

Professionalism

- To what degree would you agree with the following statements (on a scale of 1-5, with 5 being the highest):
 - The PL Partner has been accessible, available, and easy to contact throughout the partnership.
 - The PL Partner maintained a professional disposition throughout the contract/partnership and was respectful to individuals, property, and the school community.

Impact on Teaching and Learning

- To what degree would you agree with the following statement (on a scale of 1-5, with 5 being the highest):
 - The educators participating in this professional learning are proficiently incorporating the new learning methods, resulting in enhanced teaching and improved student performance.

Professional Learning Efficacy Results

Designations

Below are the results of the professional learning efficacy indicators. The results reflect data collected from over 60 school systems across the state. An average score of 3.5 or higher results in a “Meets Requirements” designation. This designation signals that the professional learning partner is providing professional learning that aligns with the LDOE’s strategy and supports effective HQIM implementation. An average score that is below 3.5 results in a “Partially Meets Requirements” designation. Professional learning partners who receive this designation will be working closely with the LDOE over the next year to implement alignment support measures to ensure that the professional learning provided is in alignment with LDOE’s strategy and supports effective HQIM implementation. A designation of “No Data Available” indicates that the professional learning partner did not provide HQIM-aligned professional learning over the last year.

*Partners are authorized to offer Professional Learning for specific versions of Louisiana’s ELA Guidebooks. Consult the [Professional Learning Partner Guide](#) to determine the approved version for which each partner is authorized to offer professional learning.
