English

Training and Education in the 21st Century

TE21 designs, generates, and markets benchmark assessments that deliver 95+ percent end-of-grade performance predictability rates to assist schools, districts, and other educational entities in targeting instruction to improve education for students. TE21 also develops and markets assessment item banks that allow teachers to develop their own high-quality formative assessments throughout the school year.

Our benchmarks are designed using the blueprints and format of the Louisiana state assessments. Following administration, TE21 provides easy access to detailed reports for the parish, school, classroom, and student levels as well as professional development on data interpretation and use of these reports. Our benchmarks and item bank are currently delivered only in the English language.

The TE21 Benchmark Assessments can be delivered using paper and pencil administration as well as through the enCASE, EADMS, or Mastery Connect online platforms. If administering on paper, precoded answer documents are shipped prior to each administration and include a return shipment label for easy return for scanning and reporting. Reports are provided within 2-3 business days once documents are received by TE21.
