

Several Certifying Agencies have remote testing options for Industry Based Certifications. This document serves to support school systems that are interested in offering remote testing to students. School systems should review the [Privacy and Security for Distance Learning](#) and the remote proctoring requirements as some of the platforms require the student to be videoed.

If you are aware of an IBC that is available through remote proctoring and not included on the chart, please reach out to [jumpstart@la.gov](mailto:jumpstart@la.gov).
