

Louisiana Educator Rubric

Released April 2024

The *Louisiana Educator Rubric* was designed through a partnership between the Louisiana Department of Education (LDOE) and the National Institute for Excellence in Teaching (NIET) to directly support improvements in classroom instruction. By clearly defining effective teaching and student-centered instruction, this rubric provides educators with a roadmap for strengthening their practice, facilitating high-quality coaching, and fostering collaboration around best instructional practices. The rubric is grounded in the NIET's *Teaching and Learning Standards Rubric*, which is based on 20 years of research and experience across 21 states, and it has been used by educators in environments ranging from urban to rural areas and in classrooms of all subjects and modalities. The rubric provides educators with a common understanding and language for designing and planning instruction and using effective instructional practices to support student learning.

The *Louisiana Educator Rubric* brings a comprehensive focus on four key domains: **instruction, planning, environment, and professionalism**. Each domain is further broken down into indicators and descriptors that clearly define effective teaching. Performance definitions are provided at levels 5, 3, and 1. Observers can score performance at levels 2 or 4 based on evidence and their professional judgment. [A rating of 2 often occurs when examination of the evidence is stronger than unsatisfactory, but there is not enough specific evidence to merit a proficient rating. A rating of 4 often occurs when many of the descriptors in the proficient level are evident and strong, but there is not enough evidence or consistency to merit an exemplary rating of 5. These ratings should always be based on close evaluation of evidence, including student work and observation analysis.]

| | The educator adheres to system and school policies. | Consistently | Regularly | Sometimes |
| | The educator keeps timely and professional records. | Consistently | Regularly | Sometimes |

DEFINITIONS

Expectations (also known as Success Criteria) - refers to a concrete learning performance: something students will say, do, or make to indicate they are moving towards the learning goal/objective.

High-quality instructional materials (HQIM) - HQIM is fully aligned to state content standards, or national or local when state standards are not provided – what students are expected to learn and be able to do at the end of each grade level or course – and builds content-specific knowledge and skills. HQIM provides support for all learners and high-quality resources for teachers to support the delivery of meaningful instruction every day, including

- effective lesson structures and strategies;
- appropriate pacing guidance;
- meaningful, connected assessments; and
- implementation guidance and resources.
