

This guide specifically addresses Medicaid eligible providers in school settings. BESE has additional requirements for LEAs to meet for special education evaluation teams that are not addressed in this section because not all Medicaid providers are required to be a part of the LEAs evaluation team. For more information on the BESE specific requirements for evaluation teams, please see [Bulletin 746](#).

Licensure Board Information

For any additional questions about what types of services a provider is allowed to provide or for questions about the requirements for obtaining a credential, please reach out to the licensing boards directly. A list of licensure board contact information can be found [here](#).

School Counselors

School counselors have been an area of confusion in the Medicaid program for several years. Medicaid **does not** recognize school counselors as providers of any Medicaid reimbursable services. However, if a school counselor **also** possesses a license in one of the approved provider licensures listed above (such as an LPC), they are able to bill for services under that licensure (not their school counselor licensure).
