## Purpose of Knowledge Packs

In-person learning, involving traditional ELA Guidebook implementation and virtual distance learning should be prioritized. However, the Department recognizes that if school buildings do not physically open, or if a hybrid model needs to be implemented, the time available for those types of interactions might be limited.

However, it is important to remember that learning and activities assigned to students should be meaningful and should be in service of helping students master the knowledge and skills demanded by the ELA Guidebook unit. Therefore, the Department is partnering with [CommonLit](#) to release knowledge packs that will support students in building knowledge and vocabulary<sup>1</sup>.

**NOTE:** Packs should have **at least three** related texts. Some topics include more than three texts. Teachers can choose to have students read all texts or select the amount of texts their schedule allows time for.

These resources can be utilized in the following [learning scenarios](#):

- **Traditional In-person Learning:** These resources can be used to make small group instruction more meaningful for students. Teachers can support students in volume of reading and building knowledge while other students engage independently in one or more activities to support making meaning of complex, grade-level texts.
- **Virtual/Hybrid and Analog Distance Learning:** These resources can be used to give students meaningful, independent practice to support core instruction when they are learning asynchronously from home without the support of a teacher.

Directions for implementing are [available](#).

<sup>1</sup> More information about volume of reading can be found in the [Reading Guide](#).

## Knowledge Building Journals

Experts collect knowledge and vocabulary as they go along. You will do this by keeping two different types of journals – a “Rolling Knowledge” journal and a “Sensational 6” vocabulary journal. Annotating the text is one way to collect knowledge and vocabulary in order to become an expert on a topic. Teachers will need to explicitly teach the skill of annotating the text to students who have not previously used this strategy.

### Rolling Knowledge Journals

Complete the Rolling Knowledge journal after reading and annotating each text. The Rolling Knowledge journal is a place for you to collect new learning about the knowledge topic and capture connections that add to your existing knowledge on the topic.

1. Read and annotate each text, then answer the following questions in the correct columns:
  - What new knowledge did I collect about the topic while reading this text?
  - How did this text add to knowledge I already had about this topic?

### Sensational 6 Journals

Complete the Sensational 6 journal after reading and annotating each text. The Sensational 6 journal is a place for you to collect and practice using vocabulary that is important to understanding the knowledge topic.

1. Read and annotate each text, then determine the six words from each text that are most important to understanding the central idea or theme of the text.
2. Next use your six words to write about the most important ideas of the text. You should have as many sentences as you do words.
3. Complete this chart for each text that you read.
4. After reading all the texts included in the knowledge pack, go back and review your words.
5. Select six words from ALL the word lists that stand out as the most important to the central idea or theme of the texts you read. These words will be known as the “Sensational 6.”
6. Use the “Sensational 6” words to summarize the knowledge you gained from the texts in this knowledge pack.

## Annotation Strategy

- *Underline* the major points.
- *Circle* key words or phrases that are confusing or unknown to you.
- Use a *question mark (?)* for questions that you have during the reading. Be sure to write your own question.
- Use an *exclamation point (!)* for things that surprise you, and briefly note what it was that caught your attention.
- Draw an *arrow (→)* when you make a connection to something inside the text, or an idea or experience outside the text. Briefly note your connections.

## Final Project

Each knowledge pack should culminate with students creating a final project to showcase their knowledge of the topic and express their understanding of the texts. Final projects should include both a product and a presentation.

- **Product:** Students will create a product which expresses their understanding of the texts and topic. This product should be appropriate to the grade level and task. Teachers should choose the final product or offer a selection of options for a final product and allow student choice.
- **Presentation:** Students will showcase their products and knowledge of a topic. Presentations can be in person, virtual via video conference, and/or prerecorded and shared.

### Possible Final Project Products
